Sustainability at Scale: Connecting Small-Scale Fishers for the Mobilization of Local Knowledge, Solutions and Capital Opportunities

Small-scale fishers and organizations are flexible and make daily decisions to adapt to local, national, and international stressors. The mobilization of local decisions towards sustainability and social benefits represent a great opportunity for the viability and resilience of small-scale fisheries in Latin America and the Caribbean. Through the use of technology, specifically PescaData App, COBI is promoting the mobilization of local knowledge, solutions, and capital opportunities for communities resilience and ocean sustainability.

V2V THEMATIC WEBINAR SERIES 2022

Speaker:

Dr. María José Espinosa-Romero

Dr. María José Espinosa-Romero is the CEO of Comunidad y Biodiversidad (COBI), a Mexican non-profit organization that promotes sustainable fishing and marine conservation in Latin America and the Caribbean through community based approaches. She is also the co-founder of Innovación Azul Initiative. She received her PhD degree in Governance and Public Policy from the United Nations University and Maastricht University (UNU-MERIT), Netherlands, and her Master's degree in Natural Resource Management and Environmental Studies from the University of British Columbia, Canada.
