The Role of Sustainable Fisheries in Supporting Vulnerability to Viability (V2V) Transition

The pursuit of creating sustainable fisheries worldwide is of utmost importance due to its numerous benefits. This presentation aims to enhance understanding of the vital role sustainable fisheries play in bolstering fish stocks and improving the socio-economic well-being of fishing communities. Additionally, it outlines practical management actions that can be implemented to achieve sustainability in fisheries. The webinar will also delve into the key factors that make these management actions effective in helping fishing communities transition from vulnerability to viability.

V2V THEMATIC WEBINAR SERIES 2023

Speaker:
Dr. Evans Kwasi Arizi

Dr. Evans Kwasi Arizi is a Fisheries Scientist specializing in fish stock assessment, dynamics, and oceanography. He is a lecturer at the University of Cape Coast (UCC), Ghana, and holds a PhD in Biological and Environmental Sciences from the University of Rhode Island (URI), USA. His research focuses on using biological characteristics of aquatic organisms for sustainable aquatic ecosystem management, aligned with UN SDG 14. Dr. Arizi is also a member of the Scientific and Technical Committee (STC) of the Fisheries Commission of Ghana.
