

V2V Global Partnership is supported by the Social Sciences and Humanities Research Council of Canada under its Partnership Grants Program

What Do Nature-based Solutions (NbS) and Locally-led Adaptation (LLA) Mean for Small-scale Fisheries?

This talk will briefly introduce two emerging approaches - Nature-based Solutions (NbS) and Locally-led Adaptation (LLA) - in context of climate crisis and will discuss the currently available standards/principles related to them. Using a couple of SSF cases, this talk will then explore the challenges and opportunities to capitalize on these novel concepts to influence our efforts in the context of SSF's vulnerability and viability, especially in the knowledge/evidence creation and system/policy influencing spaces.

V2V THEMATIC WEBINAR SERIES 2022

Speaker:

Dr. Haseeb Md. Irfanullah

@hmirfanullah

Dr. Haseeb Md. Irfanullah is a biologist-turned-development facilitator, and has worked for different international environment and development organizations, academic institutions, funders, and the Government of Bangladesh in different capacities. Currently, he is an independent consultant on environment, climate change, and research systems. He is also involved with the University of Liberal Arts Bangladesh (ULAB) as a visiting research fellow at its Center for Sustainable Development (CSD) in Dhaka, Bangladesh. He has been working with the International Centre for Climate Change and Development (ICCCAD) in Bangladesh and the Nature-based Solutions Initiative (NbSI) of the University of Oxford to create knowledge, build an evidence base, and facilitate a practitioner community on NbS in Bangladesh.
